

Screen Wall & Fencing

Screen Walls have cut stone patterns on both sides of the posts and panels. They may be stained to have the appearance and coloration of natural stone. Typical height is 6 feet to 8 feet. The Stone Fence has ~12 foot post spacing. The AcoustaCrete Fence is sound absorptive on both sides and is constructed with 15 foot post spacing. Posts may have caps. Posts are bolted down to a precast footing supplied by Faddis or cast in place installed on site.
