

AcoustaClear®

AcoustaClear with Optix extruded acrylic noisebarrier has been installed on an Interstate highway project as shown above on I-71 in Ohio and is ready for applications requiring visibility and protection from noise.

Transmission loss measured per ASTM E-90 is STC 32 for 1/2" acrylic and STC 34 for 3/4". Galvanized steel frames are available for post spacing of 8, 10, 12, 16, 20 or 24 feet. Anodized aluminum frames available in post spacing up to 16 feet. Posts may be steel or concrete, ground or structure mounted.
